## DESPONDENT WOMAN TAKES HER OWN LIFE

Sends Children to Notify Neighbors to Come and Shoot Her When They Leave.

Douglas, Ariz., July 30.—Despondent because of ill health, her recent separation from her husband and the fact that her eldest son had been sent to the state reform school for petty thievery, Mrs. Gertrude Campbell, wife of Elmer E. Campbell, a railroad man, shot and killed herself.

Calling her sons to her bedside the woman asked one of them to go to the home of a neighbor, and the other to go to his sister's home, each to ask the one to whom he bore the message to come immediately. Hardly had the boys left the house when the report of the revolver was heard. Rushing back, the boys found their mother expiring while in her hand was clasped a .32 caliber revolver which she had kept under her pillow for the purpose of protecting herself from intruders. A physician was summoned but arrived after she had died. A coroner's jury returned the verdict of suicide.

Burglaries continue frequent in Douglas. Not a night has passed during the last two weeks without its robbery or an attempt, or at times two or three. The home of Millard Haymore, an Agua Prieta merchant, was entered, was entered and five handsome gowns belonging to his wife, a small sum of money and a collection of valuable old coins taken. The general store of Joe Lefebvre, at Pirtleville, a suburb, was burglarized and more than \$150 worth of merchandise stolen.

## BIG IRRIGATION DAM AT OSCURA

Will Irrigate Large Area of Orchard Near There—School House at Oscura To Be Enlarged.

Oscura, N. M., July 30.—Construction work on the Malaga Spring dam, about a mile east of town, is practically completed. H. V. B. Smith, of Santa Rosa, the engineer in charge of the work, was here this week on an inspection trip. It is understood that the work of installing the pipe line and construction of ditches will proceed at once, with a view of putting in shape a large acreage of orchard land below the dam, which will probably be set to trees this fall or next spring.

The Malaga dam is a handsome piece of concrete construction, and is believed to be only the beginning of more extensive plans for the development of the valley of the Malaga. The natural advantages of this location are many, but for various causes their development has been retarded. The Bill gap project, started some three years ago, but work on which was suspended, will be again taken up. It is rumored that this project, if completed along the lines originally planned, will bring several hundred acres of valuable land under ditch between here and the lava beds. It is stated that parties interested in the Malaga dam contemplate laying a pipe line for the purpose of conveying water into town for fire protection and other uses. The elevation of the reservoir is such that water may be conveyed in a strong stream to the highest building in town, and the advantages of the dam in this regard alone are inestimable.

The local school board has let the contract for the enlargement of the school house, and the work is now under way in charge of W. H. Corwin. The addition to the building will greatly increase the school facilities here the coming school year. Concrete is being used in the foundation work, and the superstructure will be of the same construction as the main building.

## FRANKLIN CANAL TO BE CEMENTED

City Plans Parking Along Irrigation Canal in the Fall. After Last Water Has Passed.

Next October, when the last water for irrigating has come down the Rio Grande and lost itself in the farms below the city, the Franklin canal through El Paso is to be cemented. There will be about 10,000 feet to be cemented, at a cost of nearly \$5 a foot. However, this will be cheaper in the long run than the present system, because it will allow of a smaller and narrower waterway. The city can then take up the proposition of parking this street right through the city limits, affording a parkway for the residents of Chihuahuita.
